Promoted Ads

Text Ads

Get your message out to the world with a simple text ad. With all the elements of a standard post, including likes, replies, favorites and reposts, these native ads feel more like the rest of X content and allow you to expand the reach of your posts beyond your followers to your desired target audience.

post copy: 280 characters. (Note: each link used reduces character count by 23 characters, electing 257 characters for X copy.)

Image Ads

Highlight your best creative and drive people to your site, app, or take an action in the moment. Image Ads allow you to showcase your brand, product, or service with a single photo. They're easy to create and can support multiple objectives. They can be reposted, replied to, and liked, and they're clearly marked as "Promoted".

These specs are applicable to any Image Ad. For more specifics depending on the type of Image Ad, see below.

post copy: 280 characters. (Note: each link used reduces character count by 23 characters, electing 257 characters for X copy.)

File types: PNG and JPEG are recommended. We do not accept BMP or TIFF files.

Note: GIFs uploaded will render as a static image.

File size: Max 5MB

Image Ads with App Buttons

Image Ads with Conversation Buttons

Image Ads with Polls

Image Ads with Website Card

^

v

Standalone Image Ads

Video Ads

Capture attention and tell a strong story with a visually engaging video ad. Video Ads allow you to showcase your brand, product or service and bring them to life through video. They're easy to create and can be used to drive people to a website, app, or simply to engage with your brand's message.

These specs are applicable to any Video Ad. For more specifics depending on the type of Video Ad, see below.

post copy: 280 characters. (Note: each link used reduces character count by 23 characters, electing 257 characters for X copy.)

File types: MP4 or MOV

File size: 1 GB max. For optimal performance we strongly recommend to keep files under 30 MB.

Video length: 15 seconds or less is recommended. Up to 2:20 is supported. (Select advertisers are eligible to request an increase up to 10 minutes; however, we advise videos to be 9:55 to account for a range of video files. Please contact your X Account Manager for more information.)

Branding: Highly recommended throughout; if using a logo, it should be persistent in the upper left hand corner. Prominent product placement is highly recommended for driving product consideration.

Captions: Closed captioning or text overlays are strongly recommended.

Video bitrate: 6,000 - 10,000k (recommended 6,000k) for 1080p. 5,000k - 8,000k (recommended 5,000k) for 720p.

Frame rate: 29.97FPS or 30FPS. Higher is acceptable (support up to 60FPS). If the available video has a lower frame rate don't try to "upsample" it.

Audio codec: AAC LC (low complexity)

Video codec recommendation: H264, Baseline, Main, or High Profile with a 4:2:0 color space.

Thumbnail

- Supported files: PNG or JPEG
- Aspect ratio: recommend matching sizing of the video
- Max size: 5MB

Looping: Videos will loop if the video length is under 60 seconds.

Standalone Video Ads

Video Ads with Website Card

Video Ads with App Buttons

Video Ads with Conversation Buttons

Video Ads with Polls

Vertical Video Ads

Tell your brand's story in a more captivating way and reach more scale for your campaigns on X with a full-screen, sound-on ad unit within X's high-growth Immersive Media Viewer.

Vertical Video Ads appear within the Immersive Media Viewer, which is accessed through the Video Tab, or by tapping into any organic video to full screen and swiping up.

Creative and Technical Specs

- **Length:** <15s recommended (up to 2:20 supported)
- **Maximum Resolution:** 1080 x 1920
- **Minimum Resolution:** 720 x 1280
- **Aspect ratio:** 9:16 Vertical Video is recommended, additional formats include:

4:5 - 1440 x 1800 pixels

2:3 - 1080 × 1620 pixels

1:1 - 1080 × 1080 pixels

1.91:1 - 2064 × 1080 pixels

16:9 - 1920 × 1080 pixels

9:16 - 1080 × 1920 pixels

- **Maximum Frame Rate:** 60 fps
- **Maximum bitrate:** 25 Mbps
- **Target bitrate:** 5-10 Mbps
- **Video codec:** H264, Baseline, Main, or High Profile with a 4:2:0 color space.

Audio codec: AAC LC (Low complexity)

[Learn more about Vertical Video...](https://business.x.com/en/products/vertical-video-ads) (<https://business.x.com/en/products/vertical-video-ads>)

Carousel Ads

Tell a story and drive users to your website or app — all within a single ad. Carousels give marketers up to 6 horizontally swipeable images or videos to showcase multiple products or promotions, advance a narrative across several visuals, and highlight the most exciting features of a product.

Number of slides: 2-6 (Images or Videos)

Media size

- **Image Carousels:** 800 x 418 pixels is recommended for 1.91:1 aspect ratio. 800 x 800 pixels is recommended for 1:1 aspect ratio.
- **Video Carousels:** 800 x 450 pixels is recommended for 16:9 aspect ratio. 800 x 800 pixels is recommended for 1:1 aspect ratio.

Aspect ratio

- **Image Carousels** using a single aspect ratio within one carousel:

4:5 - 1440 × 1800 pixels

2:3 - 1080 × 1620 pixels

1:1 - 1080 × 1080 pixels

1.91:1 - 2064 × 1080 pixels

16:9 - 1920 × 1080 pixels

9:16 - 1080 × 1920 pixels

- **Video Carousels** using a single aspect ratio within one carousel:

4:5 - 1440 × 1800 pixels

2:3 - 1080 × 1620 pixels

1:1 - 1080 × 1080 pixels

1.91:1 - 2064 × 1080 pixels

16:9 - 1920 × 1080 pixels

9:16 - 1080 × 1920 pixels

- For Carousels using mixed media, aspect ratios should remain consistent (1:1 image asset with 1:1 video asset).

Link: One web or app destination for single-destination Carousels. Up to six unique web destinations for multi-destination Carousels.

[Learn more about Carousel Ads \(https://business.x.com/en/advertising/carousels\)](https://business.x.com/en/advertising/carousels)

Website Carousels

App Carousels

Standard Features

Conversation Button

Drive engagement and conversation with embedded buttons that prompt users to post about your brand to their followers.

Conversation Buttons are standard features that can be added to Promoted Ads that include call to action buttons with customizable hashtags. Once clicked, the button creates a pre-populated post that users can customize or post out. Conversation Buttons have proven to be an effective way of engaging with customers, and driving them to share a brand's message.

Conversation Card (original post in timeline)

Post copy: 280 characters

Hashtag: 21 characters, including the hashtag character

Pre-populated user post (once user clicks on the CTA)

Post copy: 256 characters

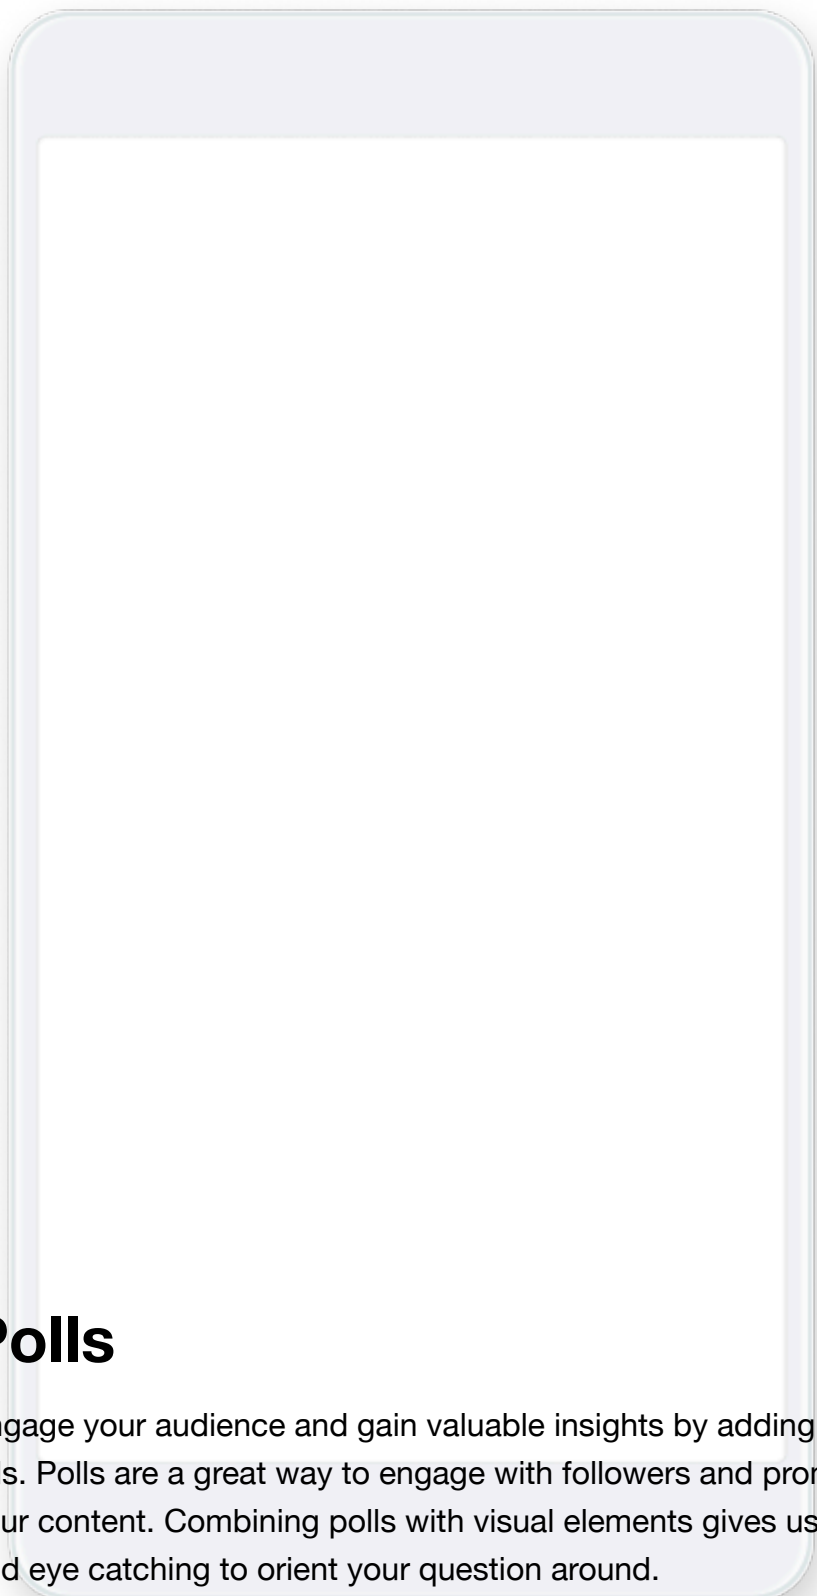

Headline: 23 characters

Thank You post (after user has published their post)

Thank you text: 23 characters

Thank you URL (optional): 23 characters

Conversation Buttons must be paired with media (image or video). See above for media specifications when paired with Image Ads or Video Ads.

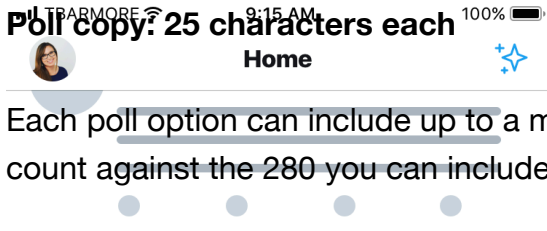

Polls

Engage your audience and gain valuable insights by adding interactive polls to your ads. Polls are a great way to engage with followers and prompt users to engage with your content. Combining polls with visual elements gives users something specific and eye catching to orient your question around.

Post copy: Polls can include up to 280 characters of post copy.

Poll options: 2-4 custom poll options

You can add two to four custom poll responses to create your poll.

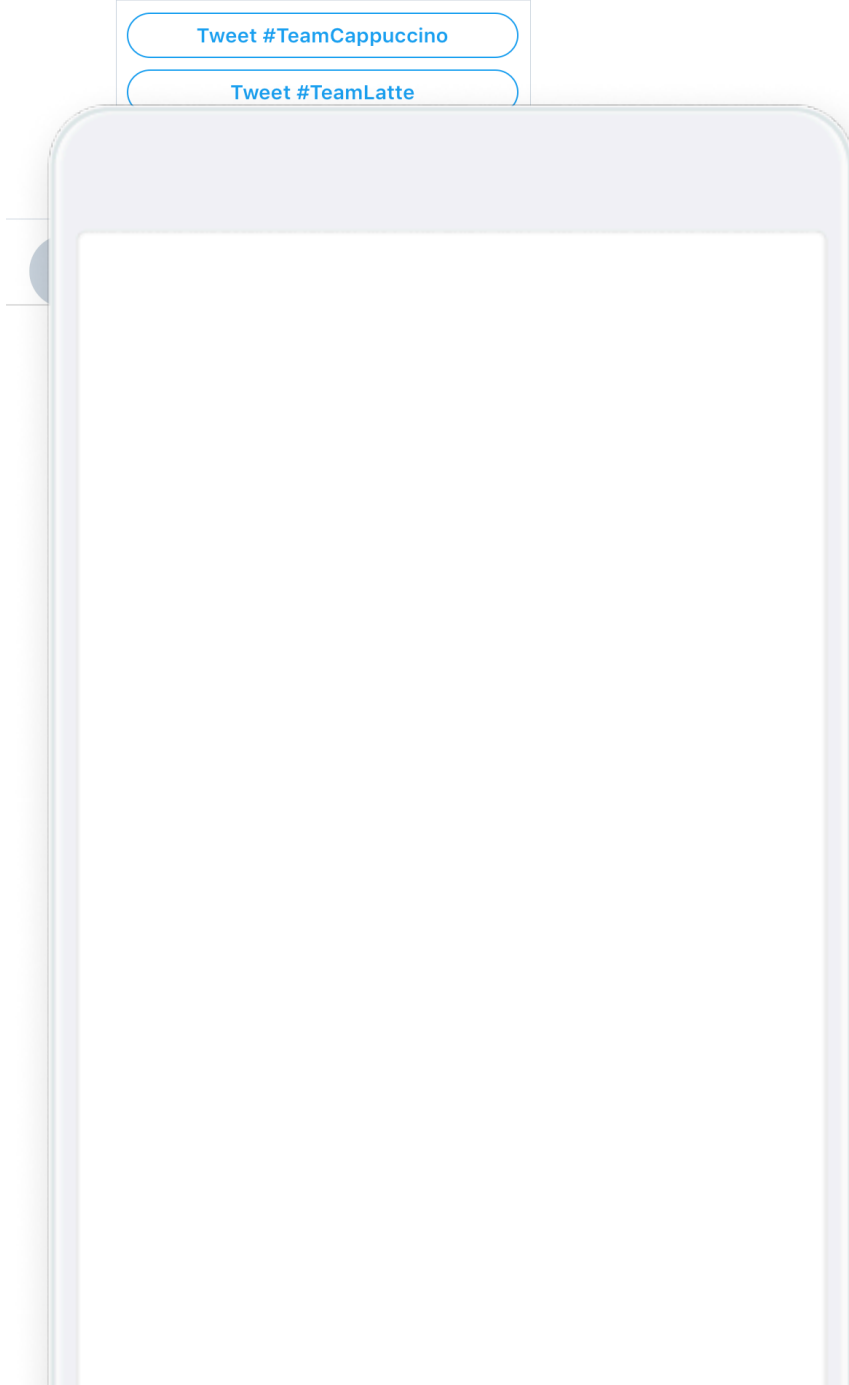

Each poll option can include up to a maximum of 25 characters of text (which do not count against the 280 you can include in post copy).

Select a time between a minimum of 5 minutes and a maximum of 7 days. Poll duration starts when the post is created, not when promoted.

Polls can be created with or without media (image or video). See above for media specifications when paired with Image Ads or Video Ads.

X Amplify

More on Amplify_ (<https://business.x.com/en/advertising/campaign-types/amplify-pre-roll>).

Amplify Pre-roll

TBARMORE 9:15 AM 100%

Run pre-roll ads to align your brand with brand-safe, premium content your customers are already watching — including highlights and top clips.

From catching must-see sports highlights to sharing reactions to the season finale, audiences love what they can discover what's happening with video on X. Amplify Pre-roll aligns your brand with in-feed video content from 200+ premium, brand-safe video publishers, including top TV networks, major sports leagues, and professional news outlets. Get in front of your audience with pre-roll ads that kick off the videos they're interested in.

8,917 votes · 10 hours 4 minutes left

File size: Maximum file size is 1GB.

Promoted

Video length: Recommended 15 seconds or less. Max: 2 minutes and 20 seconds.

File types: MP4 or MOV

Video aspect ratio: 1:1 is recommended as it will always render as square on desktop and mobile, timeline and profile. This and 9:16 (vertical) will take up the same amount of real estate, which is more than 16:9.

Your ad will automatically be matched with publisher content that has a similar aspect ratio when available, but we recommend taking a look at the kind of publisher content you'd like to run on and planning to mirror trends in aspect ratio

Recommended video size: 1200 x 1200 (minimum for 1:1 is 600 x 600)

If not a 1:1 aspect ratio: 640x360 minimum

URL (optional): must begin with http:// or https://

Branding: Highly recommended throughout (keeping in mind that Amplify Sponsorships have product overlays in the top left and bottom right and left corners for publisher video previews, ad countdowns, etc.)

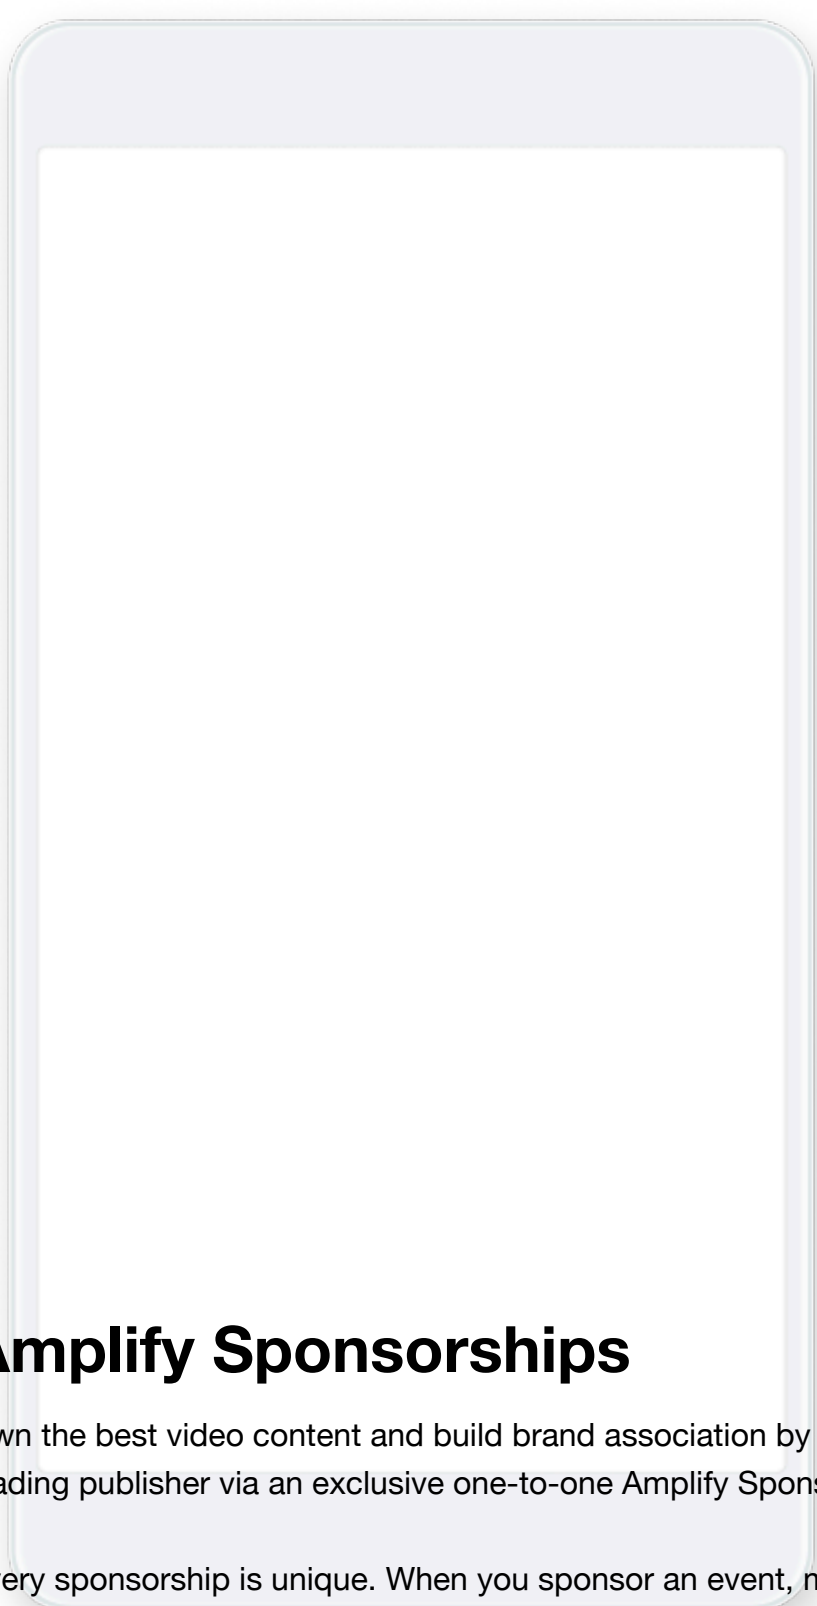

Captions: Closed captioning or text overlays are strongly recommended.

Video bitrate recommendation: 6,000 - 10,000k (recommended 6,000k) for 1080p.
5,000k - 8,000k (recommended 5,000k) for 720p.

Frame rate recommendation: 29.97FPS or 30FPS. Higher is acceptable. If the available video has a lower frame rate don't try to "upsample" it.

Audio codec recommendation: AAC LC (low complexity)

Video codec recommendation: h264, baseline, main or high profile with a 4:2:0 color space.

Amplify Sponsorships

Own the best video content and build brand association by pairing yourself with a leading publisher via an exclusive one-to-one Amplify Sponsorship package.

Every sponsorship is unique. When you sponsor an event, moment, or show on X, we work with our publisher partners to create packages that are right for you, such as pre-roll ads before video clips, pre-roll ads before live video, and branded content integrations. When the crowd cheers and the world celebrates, your brand can be right there, connected with what's happening.

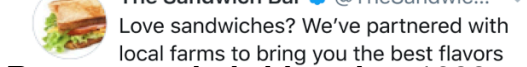

File size: Max 1 GB.

Video length: 6 seconds or less recommended. Max: 2 minutes and 20 seconds.

File type: MP4 or MOV

Aspect ratio: 16x9 or 1x1 recommended, dependent on publisher content

Recommended video size: 1200 x 1200 (minimum for 1:1 is 600 x 600)

Video will play after ad

Any height is acceptable, but if the height exceeds the width, the video will be cropped to 1:1 in the feed.

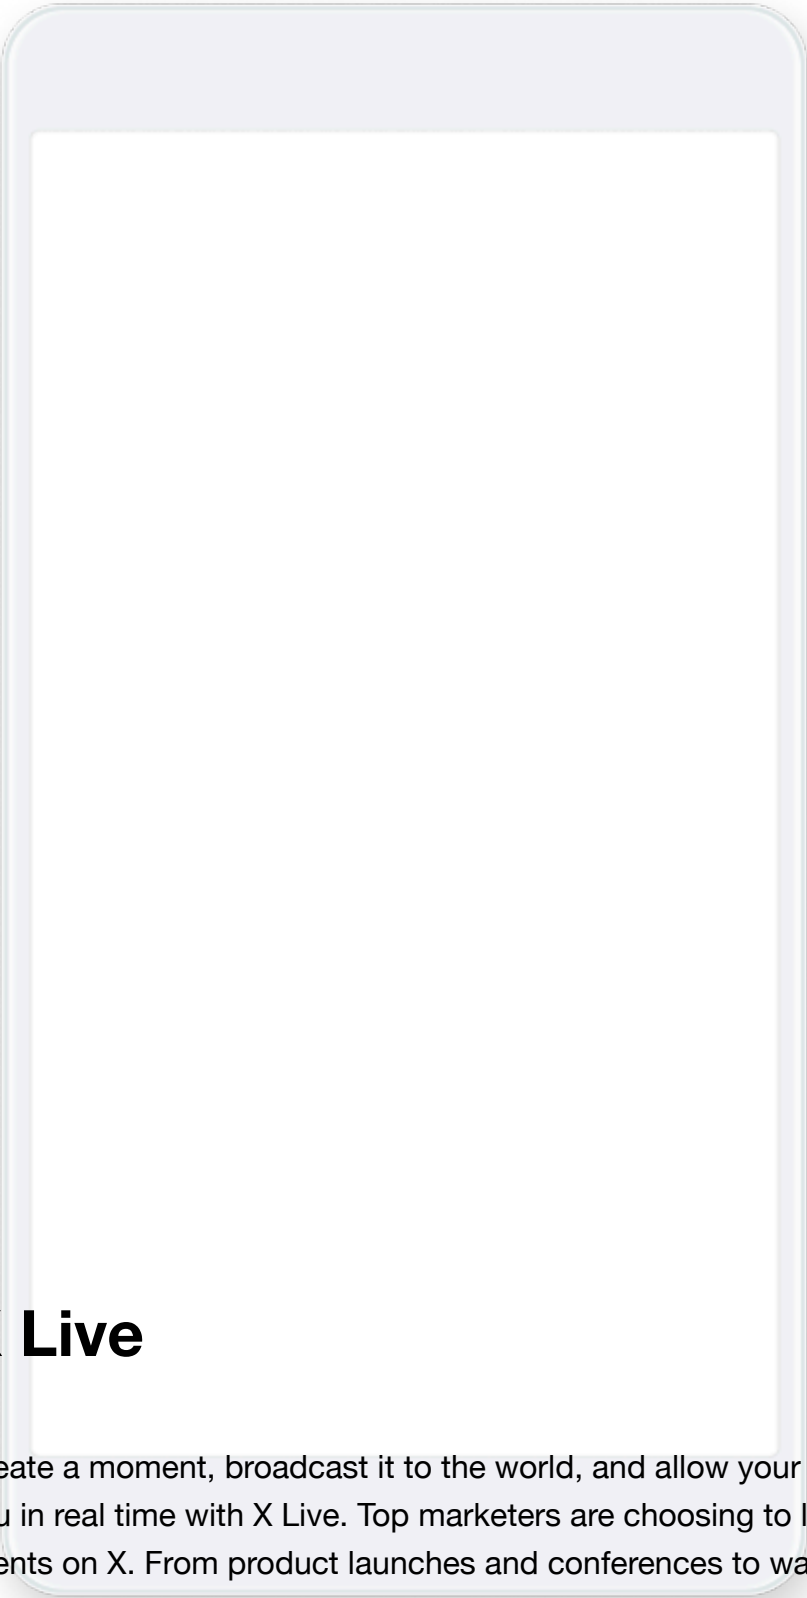

If not a 1:1 aspect ratio: 640 x 360 minimum

URL (optional): must begin with http:// or https://

Branding: Highly recommended throughout (keeping in mind that Amplify Pre-roll has product overlays in the top left and bottom right and left corners for publisher video previews, ad countdowns, etc.)

Captions: Closed captioning or text overlays are strongly recommended.

X Live

Create a moment, broadcast it to the world, and allow your audience to interact with you in real time with X Live. Top marketers are choosing to livestream their biggest events on X. From product launches and conferences to watch parties and fashion shows, X Live helps brands maximize their Live content and drive conversation. X advises on content strategy and guides the execution of your live video content.

Recommended stream specifications

Please follow the stream specifications recommendation below for the best Producer experience. Please note: The list of supported encoders and services is not exhaustive and is subject to change.

RTMP

Video codec: H.264/AVC
Video bitrate: 9Mbps (recommended), 12Mbps (maximum)
Audio codec: AAC-LC
Audio bitrate: 128Kbps (maximum)

Resolution

1280x720 (recommended)

1920x1080 (maximum)

Frame rate

30 fps (recommended)

60 fps (maximum)

Keyframe interval

OBS: Every 3 seconds

Wirecast:

24 fbs = Keyframe interval of 72 frames

30 fbs = Keyframe interval of 90 frames

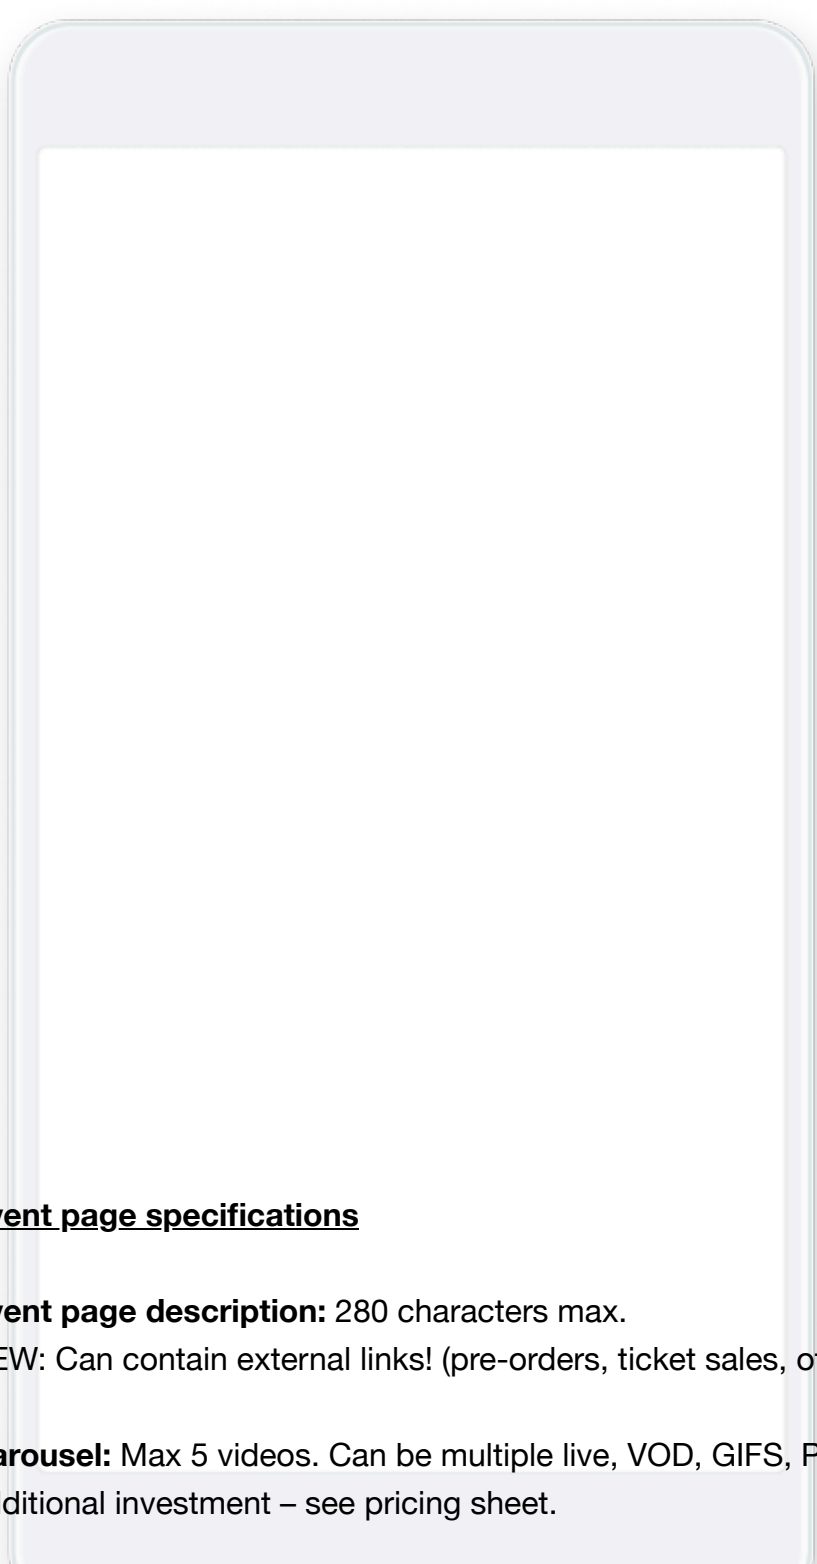

50 fbs = Keyframe interval of 150 frames

60 fbs = Keyframe interval of 180 frames

Supported encoders and services:

- Restream
- Golightstream
- Socialive
- OBS
- Wirecast

- Teradek
- Elemental
- Vmix
- StreamYard
- Streamlabs

Event page specifications

Event page description: 280 characters max.

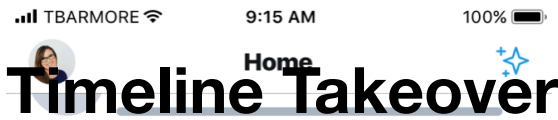

NEW: Can contain external links! (pre-orders, ticket sales, other O&O site)

Carousel: Max 5 videos. Can be multiple live, VOD, GIFS, Photos. Requires additional investment – see pricing sheet.

Timeline post: Pulls in posts specific terms. Max 5 terms. For example: keywords & phrases, executive names.

X Takeovers

More on X Takeovers (<https://business.x.com/en/advertising/takeover.html>)

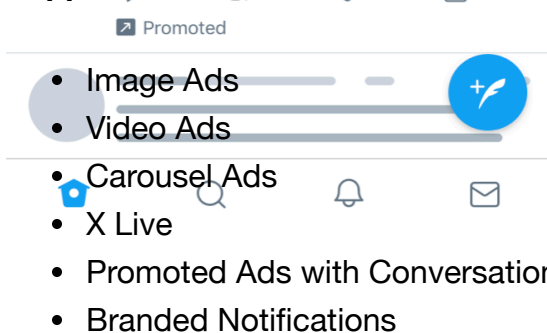

The first ad of the day at the top of the conversation.

Timeline Takeover puts your brand at the top of the conversation as the first ad of the day. People come to X to discover what's happening. With Timeline Takeover, your ad is the first ad that will appear when someone opens X for the first time that day. Don't just be a part of what's happening, be what's happening with Timeline Takeover.

Post copy: Specs for a Timeline Takeover placement will depend on the format used. Reference individual specs pages for the format you want to run.

Supported formats:

Spotlight Takeovers

Spotlight Takeovers put your immersive video creative where the conversations starts — the Explore tab. The Explore tab is home to everything that's trending on X (and in the world), all in one place. Don't just be a part of what's happening, be what's happening with Spotlight Takeovers.

Trend name (required):

Appears on the homepage of X.com for all users within a Trend's region and within the Explore tab on mobile. 20 characters max.

Trend description (optional but highly recommended):

Appears directly below the Trend Name on the homepage of X.com for all users within a Trend's region and within the Explore tab on mobile. 30 characters max.

Companion Promoted Ad (required):

Craft 3-6 Promoted Ads (can be image, video, gif, etc) to support the trend. These are eligible to show in the home timeline for users on both web and mobile, making the trend more discoverable.

Note: The Spotlight Takeover placement is not age-gated. Please ensure the GIF or image asset provided is appropriate for all ages (i.e. no weapons, guns, nudity, violence, etc.).

File types: MP4 Video or static image

Aspect ratio: 16:9 (1280x720 recommended)

Maximum File size: 5MB for image, 15MB for GIF

Trend name: Max 20 characters

Trend description: Max 30 characters

Creative must be delivered to X via a darkpost, with media (either GIF, MP4, or image) only. Media in card formats cannot be accepted.

Trend name & description:

- Spotlight Takeover will be attributed to @brandhandle, so no need to overtly brand the Description field.
- Use the Description to provide further context to your trend, make it declarative & intriguing.
- Avoid click-bait phrases such as “50% off”, “Buy One Get One Free”, “Limited Time Only”, etc.

Branded Features

Branded Notifications

Branded Notifications enable advertisers to have 1-1 conversations with customers at scale, delivering time-triggered, automated @mention posts directly to opted-in users at the moments that matter the most.

Advertisers configure and launch Branded Notifications campaign using Arrow, a third-party autoresponse platform developed by IC Group in collaboration with X Next.

Branded Notifications are available in three campaign formats:

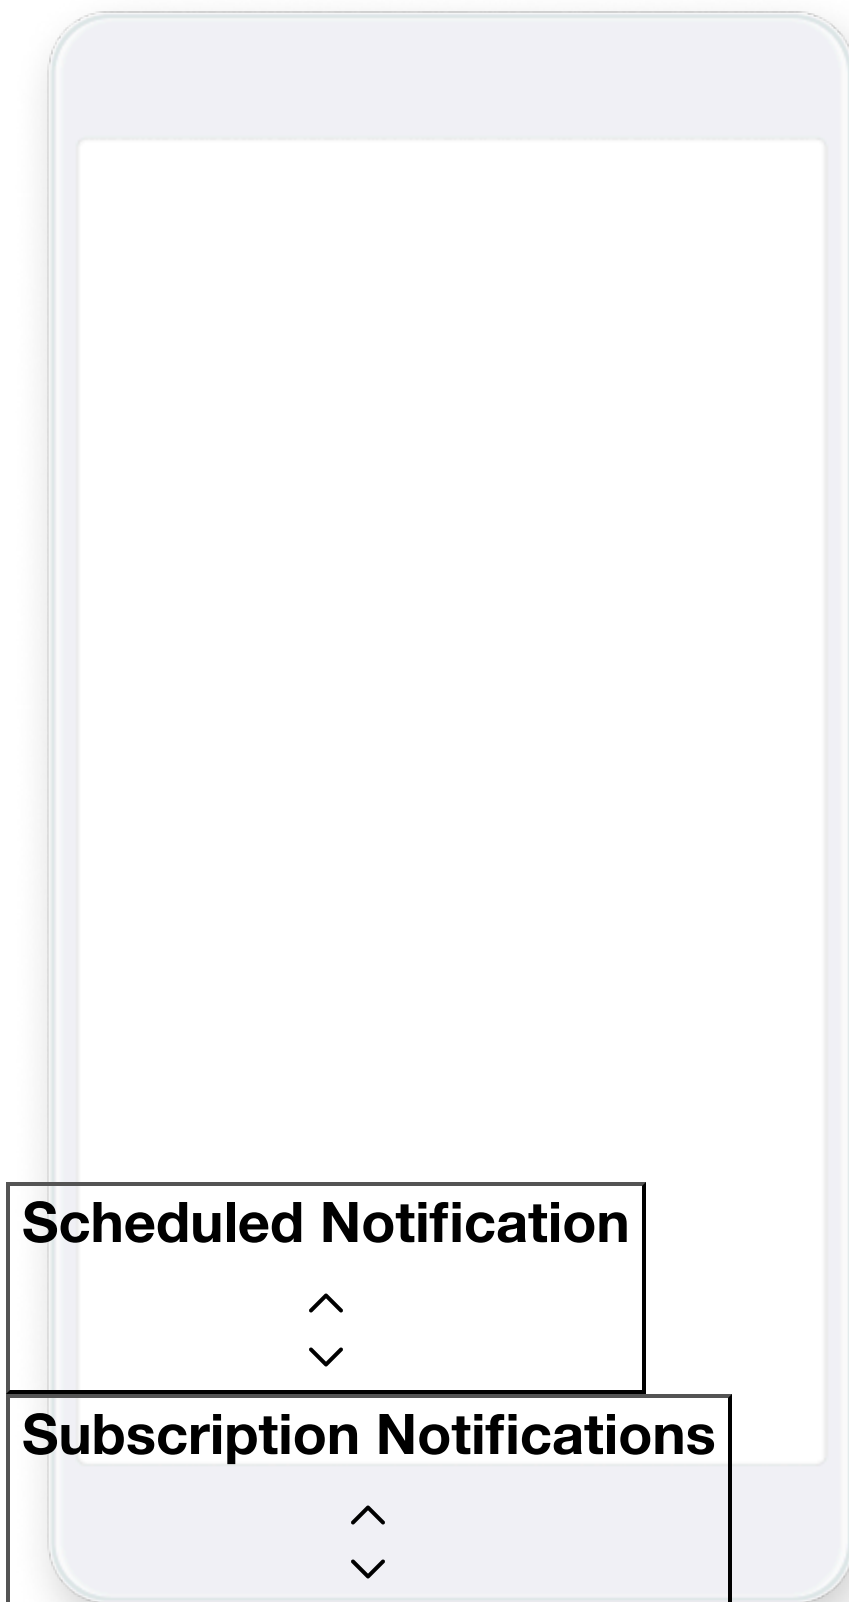

- **Scheduled Notification** campaigns deliver an instant opt-in notification post and *single* scheduled notification post to each opted-in person.
- **Subscription Notifications** campaigns deliver an instant opt-in notification post and *multiple* scheduled notification posts to each opted-in person.
- **Instant Notification** campaigns deliver an instant notification post to each opted-in person.

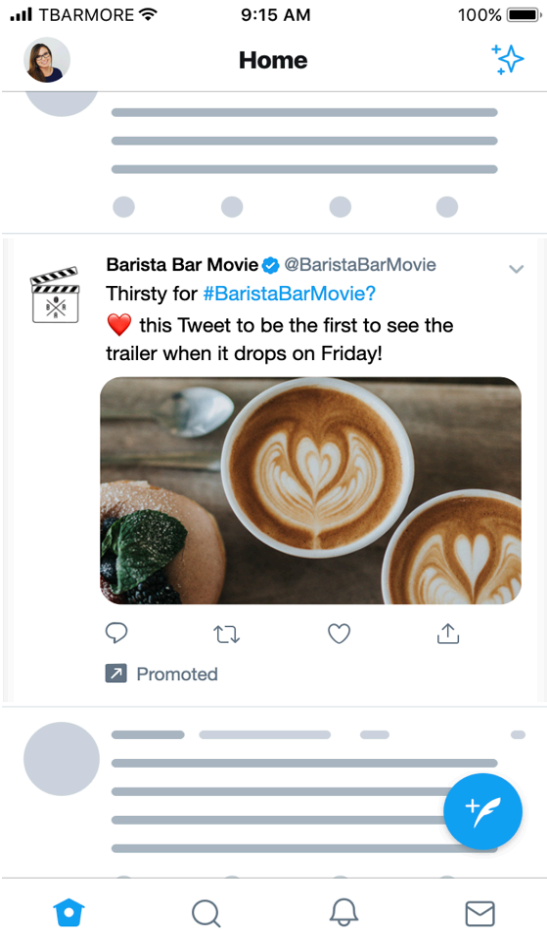

[More on Branded Notifications](https://business.x.com/en/advertising/branded-notifications) (<https://business.x.com/en/advertising/branded-notifications>)

Branded Notifications call-to-action (CTA) and notification posts should follow X's standard Promoted Ad specs. Arrow enables advertisers to use the following ad formats in CTA and notification posts:

- Standalone Image and Video Ads
- Image and Video Ads with Web Button
- Image and Video Ads with App Button
- Image and Video Carousel Ads with Web Button (single destination)
- Image and Video Carousel Ads with App Button (single destination)
- Image and Video Ads with Conversation Button
- Moment Ads

Click below for the content requirements for each Branded Notifications campaign format.

Instant Notification

^

v

Additional information

- Branded Notifications are currently available to all managed advertisers in the US and Canada. Branded Notifications are also available to global advertisers working with X Next. Consult with your X Account Manager to learn more.
- Branded Notifications campaigns must adhere to the [Our Rules](https://help.twitter.com/en/rules-and-policies/twitter-rules) (<https://help.twitter.com/en/rules-and-policies/twitter-rules>), [X Ads Policies](https://help.twitter.com/en/rules-and-policies/twitter-automation), and [Automation Rules](https://help.twitter.com/en/rules-and-policies/twitter-automation) (<https://help.twitter.com/en/rules-and-policies/twitter-automation>).
- Only public X accounts can opt-in to a Branded Notifications campaign.
- Advertisers must grant a third-party automation platform (Arrow by IC Group) access to their X account using X OAuth.
- Advertisers must have a verified X account to use Branded Notifications.
- X Ads Manager provides full metrics for the promoted CTA posts, but reporting and metrics are limited for notification posts.
- App or device notifications for notification posts (@mentions) may be disabled by users' personal device or account settings.

(DPA)

Dynamic Product Ads

Deliver the most relevant product to the right customer at the right time.

Dynamic Product Ads on X leverage the latest Web Conversions products, Dynamic Product Ads can help advertisers improve Cost Per Purchase and return on ads spend (ROAS) on X.

With DPA Retargeting, you can serve ads to targeted consumers, featuring products they have engaged with (e.g. added to their shopping cart) on your website but haven't yet purchased.

With DPA Prospecting, you can acquire new customers who haven't visited your website with ads featuring products from your catalog that are most relevant to them.

Prerequisites

Implement the latest [X Pixel](https://developer.twitter.com/en/docs/twitter-ads-api/measurement/web-conversions/conversion-api) or [Conversion API](https://developer.twitter.com/en/docs/twitter-ads-api/measurement/web-conversions/conversion-api) to track required events and parameters

Enable tracking across the following events:

- Page View (formerly Site Visit)
- Content View
- Add to Cart
- Purchase events

Be sure to add contents parameters to track the specific products users are viewing, adding to their shopping cart, and purchasing

Setup your product catalog on [X Shopping Manager](#)

- Create a catalog (the Shopping Manager can support up to 1M products or an 8GB feed file)
- Use Scheduled Feeds to upload and sync your catalog data daily or multiple times per day
- Use filters to create the product sets that you'll use in your ad campaigns

Tips for Configuring a Dynamic Product Ads Campaign

- DPA supports prospecting and retargeting campaigns. However, for retargeting campaigns, you will need to create Catalog Activity Audiences (people who have interacted with products in your catalog, etc.) and later select them when creating your DPA campaigns.
- For maximum audience sizes, we strongly recommend including a relevant List Custom Audiences.

- On ads.x.com, you can create a DPA campaign under the Conversions (recommended) or Website Traffic objectives.

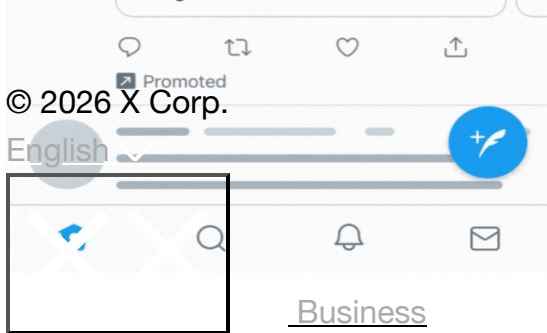

- X recently launched updates to the Terms and Conditions governing the use of X's ads and measurement products. If you are prompted while configuring your campaign, review and accept the terms before proceeding. X's master service agreement can be found [here](https://legal.twitter.com/ads-terms.html) (<https://legal.twitter.com/ads-terms.html>).
