

Hey [Client]

I'm excited to announce a new product from our Creative Strategy team – Animated Profiles are now officially available to all advertisers.

What is Animated Profile?

A captivating, immersive experience that lets brands overlay high-quality animated visual effects directly onto any X profile — instantly surprising and delighting their audience. Through a promoted post with a website card, users are redirected to a microsite where a transparent animation plays over the X profile in real time. When the animation ends, a final landing page appears with CTAs to share the experience or visit the brand's site.

Animated Profiles are great for:

- Product, Campaign, or Movie/TV Launches
- Awareness & Branding Campaigns
- Seasonal/Themed Activations (Black Friday, Christmas, World Cup, etc.)
- Partnerships & Collaborations

A few important notes: Animated Profiles are unlocked with a minimum campaign spend, which does not include media asset creation.

This format delivers a true “wow” moment and is highly shareable. Please let me know if you're interested.

Best,
