Overview

The Headline

Animated Profiles is a web experience that transforms X profiles into an immersive brand experience with premium animations — creating unforgettable, highly shareable moments.

What It Is

A mobile landing page featuring a brand-provided animation over their X profile. The experience accurately reflects the profile's current state, even matching the light/dark mode of the viewer's device.

Product, Timing, Availability

One Animated Profile includes one main 15-second web experience + up-to 4 additional profiles (5 total)

Timing: Experience runs for up to 30 days from the start date.

Surfaces: Mobile-only via X's native web player

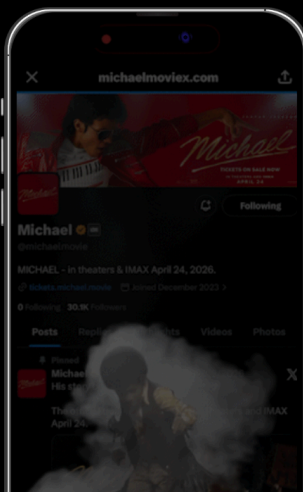

Domain: Experience is hosted at www.XAnimatedProfiles.com/ + [brand handle]

Availability: Global

Production Timeline

Min. Lead Time: 10 Days once assets are received

Recommended Lead Time: 3-4 Weeks

Production Process

- Sales creates a go/CreativeStrategyRequest for “Strategize”
- Strategist is assigned to pitch or refine the concept
- Once sold, Strategist sets up an Animated Profile campaign via ZenDesk
- ICG provides content matrix and schedule
- CAM schedules a KOC, to be led by the Strategist
- Brand will share the assets to use at least 10 working days before launching.
- Strategist reviews assets and confirms files via validator
 - Note: Asset are locked and cannot be changed 7 business days from launch
- Once campaign is complete, reporting will be provided in 3 to 4 business days

Asset Requirements

Design & Specs

All assets provided by the advertiser

1. @Handle: Profile to be used as the background

2. Animation Assets: Banded animation overlaid on a screenshot of the brand's X profile page.

Animation Assets	Specifications
Animation Video	1080×1920 .MP4 (Vertical Video) Up-to 15 seconds
Animation Alpha	Alpha Channel with transparent background, identical specs to animation video

Note: Animation designs need to work on X's light and dark modes, If there is no alpha and is a video with the brand profile in the background, two separate MP4 files are required (light profile animation + dark profile animation).

3. End Card: Visual asset and final CTA that fades in after the animation completes

End Card Asset	Specifications
Image File	Format: JPG or PNG Size: 1080×1920 (9:16) 1080×1320 .PNG or .JPG, 10 MB max
Destination	Public URL (provided by brand/sales)

Performance & Reporting

The metrics reported post-campaign will include:

- App Visits
- End card clicks

We do not have any benchmarks or expected performance data to share at this time. Please communicate this with your clients proactively. Please make sure your clients are following normal campaign best practices.

Recommended Use Cases

Ideal for brands that want to surprise, engage, and captivate their audience on X.

- **Product, Campaign, or TV/Movie Launch:** Create a powerful “wow effect” during a launch moment by transforming the brand’s profile with the new product, service, or film/tv show.
- **Awareness and Branding Campaigns:** Generate a unique visual experience that people will want to share.
- **Seasonal or Themed Activations:** Christmas, Black Friday, Carnival, World Cup, Mother’s Day, Halloween, etc. — the animation can incorporate festive elements in a fun and contextualized way.
- **Partnerships and Collabs:** When two brands come together and want to create a memorable joint moment directly on X.

How it Works

1. Through an Image Website Card or Spotlight, users are redirected to a custom microsite.
2. There, a transparent, high-quality animation appears over the X profile, creating the illusion that something is actually happening to it in real time.
3. When the animation ends, a final landing page appears, giving users the option to share their experience on X or click through to the brand’s website/ product page.
